

HPD UNIQUE IDENTIFIER: 859862016

CLASSIFICATION: 09 65 00 Resilient Flooring

PRODUCT DESCRIPTION: Premium prefabricated vulcanized dual-durometer rubber flooring. Low-emitting, smooth surface with painted concrete look. Low-maintenance, factory applied low-gloss surface treatment cured by ultraviolet (UV) processing. Massetto/Screed has a 3 mm (0.118 in) thickness, and is available in sheets (ASTM F1859; CSI/CSC MasterFormat® 09 65 16.33) or tiles (ASTM F1344; CSI/CSC MasterFormat® 09 65 19.33). Massetto/Screed is manufactured in Italy in a facility that has ISO 9001, ISO 14001, ISO 14064 and ISO 50001 certificates, where 100% of the electric energy used comes from renewable sources: water, wind and solar. We take pride in making high-quality rubber flooring that can be utilized in areas with stringent health and safety controls; we do not use red listed ingredients (2024 LBC Red List CASRN Guide) to manufacture our rubber flooring products, which includes but is not limited to harmful chemicals of concern like bisphenol A (BPA), formaldehyde, halogens, heavy metals, isocyanates, phthalates, polyvinyl chloride (PVC), PFAs and PFCs.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

INGREDIENT DESCRIPTION: Pre-Consumer Recycled Content

ANALYTICAL TESTING: Massetto/Screed pre-consumer recycled content tested by Bureau Veritas, according to standard UNI/PdR 88:2020. Certificate number 1335/001.

BATCH VARIATION: Yes, The rubber granules on the underside may be of varying colors, depending on what rubber product is being diverted from waste.

COUNTRY OF ORIGIN: Italy

MATERIAL CONTENT NOTES: The Pre-Consumer Recycled Content is a mixture of rubber dust, scraps and offcuts from our own production processes. The recycled content is reintroduced into new flooring products, as part of our internal waste diversion protocols.

Because our mixed recycled content comes from our own in-house processes, the potential presence of unknown hazardous substances, as suggested below in the automatically generated text from the HPD builder tool, is not as relevant in comparison with using external mixed content of unknown origin; our mixed recycled content is pre-consumer, post-industrial content with CASRN already screened for any human and/or environmental health hazard, as generated by the HPDC's HPD Builder Tool under the Substances tab.

This disclosure does not provide information on the potential presence of hazardous substances which may be found in certain mixed recycled materials.
